

# Business means enormous transactions & data, attracts too many queries

1Key is a tool developed in Microsoft .Net technology. The tool talks and connects to all types of software irrespective of the backend. 1 key lets software users and developers to create dynamic reports quickly and easily. Today MIS analysis of any data is most important aspect of business. If one could derive desired decision making information out of the business data, then only the data is worth its value.

1Key is catering to the needs of modern edge & competitive business. There are businesses which has got all the information in the form of data, still they are spending maximum time in analyzing data. 1 key can help you to analyze any type of data and derive meaningful information, resulting in faster, accurate & profitable decision. 1key enables to slice & dice the data and to make it more significant, serving micro & macro level analysis. It virtually makes your data speak to you.

## CASE STUDY

Kodak India has 27 depots across India having wide range of products from Photo Films to paper and chemicals. These depot's stock maintenance and inventory tracking was the main issue. 1 Key solution gave the answer to the problem.

1 Key was implemented and it gave complete insight of Kodak Inventory across depots. Due to the dynamic nature of reporting the data could be sliced and diced in variety. The MIS became very easy and to use to tool was simpler than using Excel. It was like a magic come true at the depot level and at HO where all this data were combined for one view reporting.

### Benefits:

- Ease of inventory maintenance
- Drill down from Summary to Transaction
- Ample Intelligent Analysis
- Easy Data Mining
- Data converted in decisions.

### Features

- › Easy to Use, Maintain and Deploy
- › Extensive Scalability and Extensibility
- › Comprehensive Security
- › Richly featured reports
- › Embedded reporting model enables seamless integration with any application
- › Scalability to meet end customer requirements
- › Uses Microsoft .NET technologies
- › Quick start wizards for installations
- › Tabular Reports
- › Free-style Reports
- › Drill-down and Drill-through Reports
- › Complex Reports with Sub-reports
- › Data Grouping & Regrouping
- › Distributed Data Retrieval
- › Interactive Sorting
- › Interactive Paging Export to Excel, XML and HTML
- › Codeless Parameter Page Builder
- › Dynamic Expression and Query Builder
- › Security at the Report Level

### Benefits of 1 key

- › IT hours spent on more productive projects.
- › Complete freedom for end users in variety of reports.
- › Business users having reliable information.
- › Reduction in analysis time for business users.
- › Improved accuracy in decision-making.
- › Improved efficiencies and streamlined operations.
