Web User Training Needs Assessment

Web User Training Needs Assessment (WUTNA) Survey Form

Purpose

The purpose of this assessment is to identify web user training needs in your organization. Because the data that you provide will be used to determine the training that you and fellow employees receive in the future, it is critical that you are candid and thorough in completing this form. It is recommended that you take a break halfway through this analysis to refresh your mind in order to select accurate choices. Thank you for your participation.

Read the following instructions to make your selections:

Difficulty in performing task properly	Importance in performing task properly	Frequency in performing task
1 = EASY for me to perform	1 = of MINIMAL IMPORTANCE in performing my web-related work	D = I perform this task DAILY or more
2 = SOMEWHAT EASY for me to perform	2 = of SOME IMPORTANCE in performing my web-related work	W = I perform this task WEEKLY
3 = AVERAGE DIFFICULTY for me to perform	3 = of AVERAGE IMPORTANCE in performing my web-related work	M = I perform this task MONTHLY
4 = DIFFICULT for me to perform	4 = of ABOVE AVERAGE IMPORTANCE in performing my web-related work	Y = I perform this task YEARLY or less
5 = VERY DIFFICULT for me to perform or I DON'T KNOW HOW to PERFORM	5 = of EXTREME IMPORTANCE in performing my web-related work	N = I have NEVER performed this task

There are several additional functions your form can have that are not included in this TRY or BUY version. This form results can be linked to an internal or external database, automatic check and adjustment to the users screen resolution and Adobe Reader version, auto-run when it is opened, e-mailed as a file attachment, pop-up menu, password protection, add sound and video clips, and many more.

With Adobe Reader Extensions, you can: activate additional functionality within the free Adobe Reader such as - enable any end user to save, fill out, annotate, sign, and submit your PDF documents, streamline collaboration for document reviews, automate data capture with electronic forms, enabling anyone to complete and submit forms online or offline.
